Crypto Password Generator: how it is put together

The tool is designed to assist in the creation of strong and secure passwords, mitigating the risk of password compromise. It does not focus on comprehensive security analysis but.

sketched from the files

Crypto Password Generator: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what crypto Password Generator is for

WHAT IT IS

The tool is designed to assist in the creation of strong and secure passwords, mitigating the risk of password compromise. It does not focus on comprehensive security analysis but.

WHAT GOES IN

The files at the top of the tree: main.py, README.md, requirements.txt.

WHAT COMES OUT

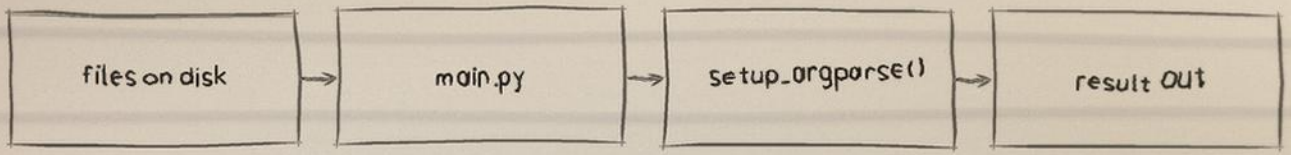

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

Crypto Password Generator: data flow, in one direction

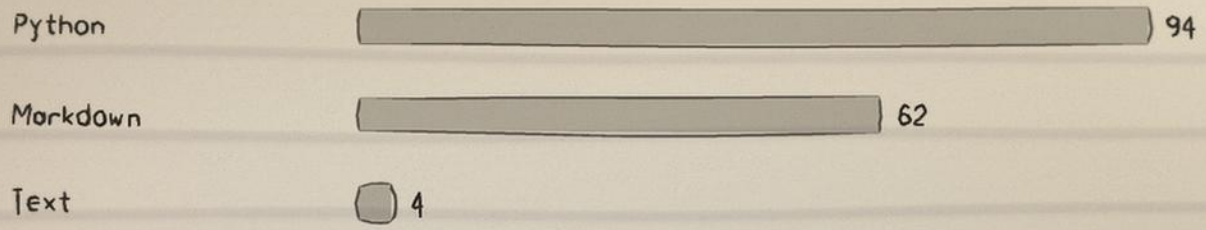

One direction. Anything the code does not do is not drawn.

second sheet, GK

Crypto Password Generator in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

4 files in the tree.
5 commits, first 2025-01-02, last 2025-01-02, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Crypto Password Generator: schematic of the apparatus

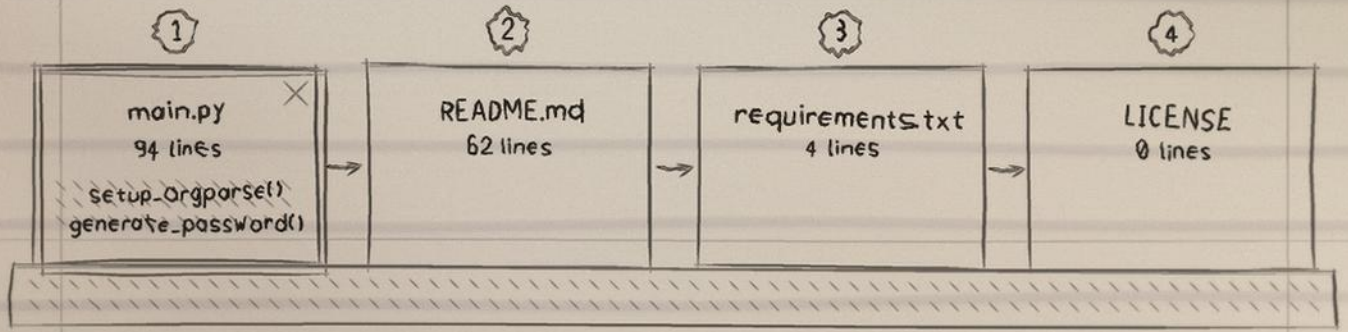

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. README.md
3. requirements.txt
4. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 4 files, 160 lines counted

turns of the crank so far: 5 commits, 2025-01-02 to 2025-01-02

measured and sketched, GK
